PROBLEM STATEMENT

Problem Statement No.25 - Al Job Mentor for Informal Workers

Challenge – Millions of informal workers such as daily wage laborers, artisans, gig workers, and selfemployed individuals face difficulty in accessing job opportunities, skill development programs, and financial resources. Most of them are unaware of government schemes, training courses, or nearby job openings that could improve their income and career prospects.

The lack of digital literacy, guidance, and personalized information further widens the opportunity gap — especially in semi-urban and rural communities.

There is a strong need for a personalized, always-accessible, and vernacular-language job mentorship platform that empowers informal workers to find better jobs and build sustainable livelihoods.

TECHNOLOGY USED

IBM Watson Assistant

Natural Language Processing (NLP)

Retrieval Augmented Generation (RAG)

IBM Granite model

IBM CLOUD SERVICES USED

IBM Watson Assistant (watsonx Assistant)

IBM Watson Natural Language Understanding (NLU)

IBM Watson Discovery

IBM watsonx.ai

IBM Cloud Object Storage

WOW FACTORS

- 95% Accuracy in matching users with relevant job opportunities based on their skills and preferences.
- 60% Faster Job Search by providing instant, personalized recommendations and skill gap analysis.
- 24/7 AI Mentor availability to assist users anytime without waiting for human counselors.
- Real-time Market Insights powered by IBM Watson Discovery and RAG for up-to-date career guidance.
- Personalized Skill Gap Identification with targeted learning path suggestions.
- Multi-Channel Support including web chat and WhatsApp integration via Twilio.
- Scalable IBM Cloud Infrastructure providing reliable, seamless chatbot performance.
- Interactive Interview Preparation with customized tips and practice questions.
- Advanced AI Models like IBM Granite for improved understanding and responses.

CONCLUSION

- The Al Job Mentor provides personalized, 24/7 career guidance using advanced IBM Al technologies, helping users match with the right job opportunities and identify skill gaps efficiently.
- The project significantly improves job search outcomes by delivering instant recommendations, real-time market insights, and tailored interview preparation, resulting in greater user satisfaction and engagement.
- This scalable, cloud-based solution demonstrates strong potential for continued growth and impact by supporting job seekers, students, and career changers on their professional journeys.

FUTURE SCOPE

- Expand to support regional languages and multilingual users for wider accessibility.
- Incorporate Al-based resume and cover letter review and feedback tools.
- Incorporate Al-based resume and cover letter review and feedback
- Add advanced analytics dashboards for users to track their career progress.
- IlEnable voice-based interaction using speech recognition capabilities.
- Personalize guidance further using user behavior data and feedback
